

EXPERIMENT 24

Create a python program that recognizes dialog acts in a given dialog or conversation.

PROGRAM

```
sentence = input("Enter dialog: ")
if sentence.endswith("?"):
    print("Dialog Act: Question")
elif sentence.lower().startswith(("please", "kindly")):
    print("Dialog Act: Request")
elif sentence.endswith("!"):
    print("Dialog Act: Exclamation")
else:
    print("Dialog Act: Statement")
```

OUTPUT:

```
elif sentence.lower().startswith(("please", "kindly")):
    print("Dialog Act: Request")

elif sentence.endswith("!"):
    print("Dialog Act: Exclamation")

else:
    print("Dialog Act: Statement")
```

```
... Enter dialog: How are You?
Dialog Act: Question
```
